

Biography:

Dr. Daniel Rolnik

MSc, MD, PhD

A/Prof Daniel Rolnik completed his Obstetrics and Gynaecology training and was awarded a Master's degree at the University of São Paulo, Brazil. He then went on to work with Professor Kypros Nicolaides at King's College Hospital and Fetal Medicine Foundation in London and undertook the Diploma in Fetal Medicine and his PhD. Daniel led the ASPRE trial, a large-scale randomised trial investigating the role of low-dose aspirin in preventing preeclampsia in the context of a large first-trimester screening program. He has published over 150 peer-reviewed scientific papers. Daniel currently works as a Consultant in Obstetrics and Gynaecology and is the Director of the Perinatal Care Centre at Monash Medical Centre, and is an Associate Professor at Monash University, Melbourne, Australia. He was recently awarded a Master of Public Health (MPH) degree in Epidemiology at Harvard University, USA.
