

Purpose of Cardiac Logbook.

- Document completion of scanning requirements
- Record interactions between candidate and supervisor.
- Demonstrate a progression from beginner to competent CCPU scanner.

To fulfil the above logbooks need to be completed contemporaneously and reviewed by supervisor as near to the scan as possible. For early scans this will usually be at the time of scanning for more advanced candidates should be within 48 hours.

The Logbook should be in addition to any internal reporting mechanisms that may exist.

There follows a sample completed page and a blank page.

CCPU Neonatal Cardiac Ultrasound - Logbook

Scanners Report			
Candidate name		Date	
Modality		Scan No	
Focussed clinical question			
Brief clinical details			
Ultrasound findings			
Clinical interpretation and management changes			
Supervisors' comments			
Quality of imaging			
Interpretation			
Recommendations			
Supervisor Name			
Signature		Date
